

**Tulare County Association of Governments**  
**Congestion Mitigation and Air Quality (CMAQ) and**  
**Carbon Reduction Program (CRP)**  
**Application**

| <b>Project Summary Information</b> |  |
|------------------------------------|--|
| Project Title                      |  |
| Agency                             |  |
| Project Manager                    |  |
| Phone                              |  |
| Email                              |  |
| Project Description                | Provide a brief narrative description, including how the project provides air quality improvements:  |
| Proposed Funding                   | <p><b>Total Project Cost:</b>    \$ _____</p> <p>CMAQ Funds Requested:    \$ _____</p> <p>CRP Funds Requested:    \$ _____</p> <p>Local Match:    \$ _____</p> |

|                      |   |
|----------------------|---|
| Cost Effectiveness   | <p>_____ \$/lb.</p> <p>Approved emissions calculations must be attached to this application. Please insert air quality benefit cost-effectiveness from emissions calculation as a function of dollars per pound of pollutants reduced. Pollutants eligible for consideration include Particulate Matter 2.5 (PM<sub>2.5</sub>) and Ozone-causing pollutants (NO<sub>x</sub> and ROG). Please provide backup documentation for air quality calculations.</p> |
| Emissions Reductions | <p>Please list the emissions reductions that will be achieved with project implementation (show in pounds per year):</p> <p>PM<sub>2.5</sub>: _____</p> <p>NO<sub>x</sub>: _____</p> <p>ROG: _____</p>  |

Project Funding  
and Delivery  
Schedule

This project can be obligated by (month/year):

\_\_\_\_\_

Estimated Project Schedule: Provide a schedule for each phase (including non-CMAQ/CRP funded phases). Use format shown below (represent \$ in thousands):

| Fund          | Phase | 2024/25 | 2025/26 | 2026/27 | 2027/28 | Total |
|---------------|-------|---------|---------|---------|---------|-------|
| CMAQ          | PE    |         |         |         |         |       |
|               | ROW   |         |         |         |         |       |
|               | CON   |         |         |         |         |       |
|               | Total |         |         |         |         |       |
| CRP           | PE    |         |         |         |         |       |
|               | ROW   |         |         |         |         |       |
|               | CON   |         |         |         |         |       |
|               | Total |         |         |         |         |       |
| Local Match   | PE    |         |         |         |         |       |
|               | ROW   |         |         |         |         |       |
|               | CON   |         |         |         |         |       |
|               | Total |         |         |         |         |       |
| Project Total | PE    |         |         |         |         |       |
|               | ROW   |         |         |         |         |       |
|               | CON   |         |         |         |         |       |
|               | Total |         |         |         |         |       |

Additional  
Information

Include the additional information needed to evaluate and score this project. Please provide a detailed project description/scope, detailed project cost estimate, project map, and narrative responses to the following scoring criteria:

***Transportation Equity***

Describe the positive impact the project will have on environmental justice communities. In this context, the term environmental justice communities is synonymous with disadvantaged communities.

***Public Involvement in Agency's Project Selection Process***

Please provide a detailed description of the public outreach that was conducted and public involvement that occurred which led to the proposed project being identified and included in the list of projects proposed for development by the agency (i.e. inclusion of the project in the agency's capital improvement program, active transportation plan, etc.).
